DETAILED ACTION

The 103 rejections of the prior office action have not changed. Applicant's amendment to the claims designating the plurality of telescoped tubular members to be well screen does not further limit the structural of the claim since the telescoped tubular conduits of Gano are well screen member (i.e. members of his well screen invention).

Response to Arguments

- 1. Applicant's arguments filed 7-30-2004 have been fully considered but they are not persuasive because of the following reasons:
- Applicant has argued (page 7) that neither Gano nor Curlett discloses the perforated innermost tubular member of a plurality of tubular members as having the embedded line. This is not found to be convincing since Gano discloses the perforated innermost tubular member (of a plurality of tubular members) and Curlett teaches an embedded line in an innermost member such that upon modification the innermost member of Gano would have the embedded line. This modification is not obviated by the fact that Curlett includes a circular screen at the bottom of his casing.
- Although the embedded limitation is shown in figure 25 of Curlett, applicant's arguments concerning figure 19 are also not convincing, since line 112 is shown as extending laterally through the innermost tubular wall. Applicant's claims do not require the entire line being embedded in the sidewall structure; a line embedded at any portion thereof would meet the limitation of the claims.

Art Unit: 1723

• Applicant's arguments (page 8) that modifying Gano to have the embedded line would eliminate or lessen his desirable snapping feature for installing the lines 83 is unconvincing since modifying the lines to be embedded would provide the benefit of reducing the numbers of steps and save time during the installation process. It is also pointed out that Gano teaches the lines can also be initially sealed if desired (col. 6, lines 42-46) such that sealing the line in the channel by expanding the strip 84 is not a concern. In addition, having the lines embedded would have the benefit of not affecting the steps of modifying the flow area that are practiced by Gano.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

3. Contact Information:

- Examiner Mr. Terry K. Cecil can be reached at (571) 272-1138 at the Carlisle campus in Alexandria, Virginia for any inquiries concerning this communication or earlier communications from the examiner. Note that the examiner is on the increased flextime schedule but can normally be found in the office during the hours of 8:30a to 4:30p, on at least four days during the week M-F.
- Wanda Walker, the examiner's supervisor, can be reached at (571) 272-1151 if attempts to reach the examiner are unsuccessful.
- The Fax number for this art unit for official faxes is 703-872-9306.
- Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
